# TouchPanel-3
# Touchscreen Panel

## Easy and Secure Access at Your Fingertips

The TouchPanel-3 is a 7" color graphic touchscreen panel with IP, LTEand WiFi capability, as well as Z-Wave compatibility for home automation.TouchPanel-3 allows users to control devices in the system via one single intuitive interface, with IP camera integration for real-time visual verification.

The TouchPanel-3 is infused with SF1 Technology, which ensures HD image alarm verification. The two-way voice communication enables users to conveniently speak directly through microphone and speaker. Meanwhile, the Bluetooth facilitates effortless and touchless disarming of the panel, making security management a breeze.

The touchscreen panel provides an effortless way for users to gain access control, as well as an easier, smarter way of living.
